CONTINUE TO WORK NEW ORE VEINS ON 1,100 OF TONOPAH BELMONT

Two new drifts have been started on the 1100 level of the Tonopah Belmont Development company's property, both of which are in ore. East drift 11,011 which is being run off from the 1100 level is following a foot of ore in the hanging wall of the Mizpah vein, and west drift 11,010 is being driven run from the northwest corner of the 1100 level. A foot of ore has also been developed in drift 11,006 off north crosscut 1196, which is in the Mizpah vein.

Operations at this property are progressing very favorably at the present time. W. J. Pike is acting as manager.

The official report of the company for the last week ending December 15 is as reported by the management as follows:

700 Level—Northwest crosscut 702, off east drift from raise 5, prospecting in Mizpah Trachyte. Raise 20, off west drift 728; 729 vein; small work low grade ore stopped.

800 Level—Northwest crosscut 84, off west drift 862; prospecting in Mizpah Trachyte. North crosscut 850, off west drift 804; prospecting in west end rhyolite for faulted segment of north vein. Raise 64, off southwest crosscut 8048; prospecting footwall of north vein.

900 Level—West drift 9035, off northeast crosscut 928; Favorite vein; one foot low grade ore. Raise 94, off vein.

TONNAGE CONDITIONS AT WEST END MINE SHOWN TO BE GOOD

Better than the average, tonnage was brought to the surface from the property of the West End Consolidated Mining company in its operations during the week ending today when 1500 tons of ore was raised. Shipments are being regularly maintained to the mill, from which the cleanup for the first half of December is about completed. The billion shipment for this period will be ready to be forwarded either tomorrow or Monday.

Report of mining preparations for the current week, as given out by the management today is as follows:

West End Shaft
413 Raise C made fair headway without cutting the hanging wall of the vein.

Drift 413 A has followed a full face of quartz, a portion of which contains milling values.

Raise 530 No. 2 on the foot-wall vein, has made connection to the 530 drift and work is being resumed in the 530 drift No. 2. Intermediate drift No. 683 was driven ahead to the east on ore of milling grade.

The 968 Raise has made connection to the 773 level from the Ohio shaft and ventilation is much improved on the 960 level.

Ohio Shaft
Drift 481 No. 1 has been stopped as the vein became narrow and low grade.

Work has been resumed in the 549 drift on the hanging wall vein.

Work has been resumed in the 577 drift No. 1 on low grade ore.

WOULD DRAFT ALL THREE IN FUTURE WARS

(By Associated Press)
WASHINGTON, Dec. 17.—Secretary of War Weeks is in favor of the draft of men, money and materials under the conscription law in the event of future wars. Such a course, the war secretary declared, in an address last night, would preclude profiteering and slack labor.

INDIA TO HAVE CHEAPEST STEEL IN THE WORLD

(By Associated Press)
LONDON, Dec. 17.—India will soon be able to produce the cheapest steel in the world, says an announcement by two British firms which have undertaken to organize the "Steel Steel Corporation of India, Ltd." They propose to establish a plant as possible works on a large scale, near deposits of iron, coal and limestone.

The plant to be erected in India will produce high quality, fluxes of special character, and excellent quality steel near close together in Bihar and Orissa, the companies state, and the cost of these materials is much lower than has to be paid for them in other steel-producing countries.

The plant to be erected in India will produce high quality, fluxes of special character, and excellent quality steel near close together in Bihar and Orissa, the companies state, and the cost of these materials is much lower than has to be paid for them in other steel-producing countries.

NEW ROYSTON COMPANY HAS BEEN BUSY

The Super Six Mining company reports excellent work being done at its property at Royston, both on company account and that being done by the lessees. The two shafts are being put down rapidly and a tunnel has been started. James Logan is superintendent of the work in progress.

On track 2 North, leased to "Tiny" Martin and associates, the shaft has reached a depth of 37 feet and the last round of shots exposed some fine looking quartz. The company shaft on the south end of the Super Six property, which has been sunk to a depth of 39 feet has one of the best showings in the entire camp.

The entire bottom of the shaft across its width of over four feet is in good quartz, assays from which show values of from \$61 to \$612, silver predominating, with the highest values in the south end and resembling the ore found in the Betts lease. A man is being driven both by the company and by Murray, Geldes and England, who are leasing a block from the Super Six, the company furnishing the funds for the work. This tunnel will intercept the vein which has been developed by open cuts on the surface for a distance of 70 feet and carries over a foot of high grade ore.

On Block 5 north, held by Austin Merrill and the Reed Brothers, what is considered to be the same vein being developed on the Betts lease, was uncovered at a depth of from six to eight feet yesterday. The ore has a width of from two to two and a half feet and was the main attraction at the camp Friday. No assays from this recent strike have as yet been made.

Briz Putman came in to Tonopah last evening and announced a new discovery on the Sunnyside claim. The ore which has been uncovered is rich in sulphides.

On the Putman ground, sold to M. L. Cooper and associates, of San Francisco, where the phenomenal strike was made some days ago, the vein has widened to four and a half feet of solid ore.

The Williamson lease on a block of the Cooper holdings is reporting four feet of ore northwest of the Super Six holdings.

BOMB MYSTERY WILL BE ALL CLEARED UP

(By Associated Press)
WASHINGTON, Dec. 17.—The arrest in Warsaw of Wolfe Lindenfeld will clear up the entire mystery of the Wall street explosion, September 16, 1920, was stated positively today by William J. Burns, head of the Department of Justice bureau of investigation. Lindenfeld was described by Burns as the key to the solution of the mystery, "and the only man we know of in the world that knows all about it." Burns declared Lindenfeld himself was not implicated in the explosion but was so close to radical elements who were perpetrators that he knew all about it. The third international, Burns said, was the moving spirit behind the plot.

(By Associated Press)
WARSAW, Dec. 17.—Plots and counterplots, reading like a chapter from fiction, were involved in the search for clues in many parts of Europe by the American secret service agents which resulted in the arrest here yesterday of Wolfe Lindenfeld, alias William Linde, for his connection with the Wall street bomb explosion in New York in September, 1920. Lindenfeld has fully confessed, the authorities say, naming the ring leaders in a plot which he declared was aimed at J. P. Morgan, the financial machine exploding prematurely. According to Silvester Cogrove and Paul Altendorf, who trailed Lindenfeld, the suspect has named five principals in the plot, now in Europe, who received \$30,000 from Moscow third international through New York communists. Lindenfeld has declared his willingness to return to New York as soon as possible, and will turn state's evidence.

(By Associated Press)
NEW YORK, Dec. 17.—A report that an arrest would be made here this afternoon in connection with the arrest of Lindenfeld in Warsaw is current. William J. Burns was to arrive here this morning.

Lindenfeld, according to Burns, went abroad originally on behalf of the justice department to obtain information which would lead to arrest of those responsible for the explosion. When no reports were received from him, Burns said Cogrove, one of the department's agents, was sent over to find out why Lindenfeld was not sending the information promised and his arrest followed.

EXTENSION OF TIME REFUSED FOR GERMANS

(By Associated Press)
PARIS, Dec. 17.—The Allied reparations commission has refused to consider Germany's request for an extension of time on the January and February payments and the German government tells just what she can pay on these installments and gives the other information demanded.

RIOTS AGAIN BREAK OUT IN BELFAST TOWN

(By Associated Press)
BELFAST, Dec. 17.—Fierce fighting broke out in the Newtownards road section and East Belfast today. The firing was so intense that tram car service was suspended. Lewis guns were used against rioters by the crown forces. An employee of the tram service was shot dead and at least six persons are known to be wounded.

Tomorrow is the anniversary of closing the gates of Derry (Dondocerry) in 1688, when was begun the famous siege by the forces of James II. which is always commemorated in Ulster by the burning in effigy of the "traitor governor." This celebration, it is feared, will accentuate the hatred feeling.

In Ballymacarrett district two persons were shot and another young man was attacked by the crown and severely beaten.

FRANCE STILL INSISTS UPON NAVAL RATIO

(By Associated Press)
WASHINGTON, Dec. 17.—France continued before the naval committee of fifteen to present her case as to her naval strength and according to a British spokesman did not recede from here "claim for the same ratio as Japan."

M. Sarraut, head of the French delegation, it was learned, recalled to the attention of the committee at today's session the promise of secrecy which had been made by all delegates Thursday, and said his agreement had been disregarded by the British spokesman. Sarraut further asserted that he kept his word and until the committee changed the rule he intended to observe the obligation.

PARIS, Dec. 17.—France has no definite shipbuilding program, it was said in official circles here today, in connection with the attitude of the French delegation at Washington on the conference on the naval ratio question. The fact she asks to be allowed to build up to 350,000 tons of capital ships does not mean she now plans a program of that sort, it was declared.

(By Associated Press)
FRESNO, Dec. 17.—An attack was made on Governor Stephens by Senator Rominger of Long Beach today, at the meeting of the United Chambers of commerce of the Sacramento valley and San Joaquin valley, which charged deliberate action on the part of the governor at the last legislative session to kill the reappointment measure presented, stating when it was but a matter of one or two votes the state's executive sent a message to Senator Allen, of Los Angeles to vote against it. He said that the information was "from authoritative source."

BETTER PROGRESS IS BEING MADE AT THE TONOPAH EXTENSION

Total development work at the property of the Tonopah Extension Mining company for the week ending December 16, showed an increase over the preceding seven days, a total of 519 feet having been accomplished. On the 1700 level excellent progress is being made in uncovering new veins of good value. Raise 1717 was advanced 5 feet one foot of ore, and raise 1711 has intercepted some low grade quartz on which a lot of work was accomplished.

The official report of the company operations for the seven days ending December 16, as given out by the management is as follows:

Number Two Shaft
600 Level—500 raise made usual 50 feet in west end rhyolite.

McKane Shaft
1200 Level—1205 crosscut advanced 26 feet in west end rhyolite.
1540 Level—1501 crosscut advanced 21 feet in Caliente Andesite.

Victor Shaft
1600 Intermediate Level—Number 1 crosscut advanced 14 feet in low grade quartz.

Raising is in progress on Morgeson vein.

4800 Level—1814 crosscut advanced 26 feet in rhyolite. 1815 crosscut advanced 21 feet in west end rhyolite.

Shoring is in progress on Morgeson vein and Jerome vein.

1700 Level—1704 crosscut advanced 26 feet in rhyolite. 1705 crosscut advanced 21 feet in west end rhyolite.

Shoring is in progress on Morgeson vein and Jerome vein.

1700 Level—1704 crosscut advanced 26 feet in rhyolite. 1705 crosscut advanced 21 feet in west end rhyolite.

Shoring is in progress on Morgeson vein and Jerome vein.

1700 Level—1704 crosscut advanced 26 feet in rhyolite. 1705 crosscut advanced 21 feet in west end rhyolite.

Shoring is in progress on Morgeson vein and Jerome vein.

1700 Level—1704 crosscut advanced 26 feet in rhyolite. 1705 crosscut advanced 21 feet in west end rhyolite.

Shoring is in progress on Morgeson vein and Jerome vein.

1700 Level—1704 crosscut advanced 26 feet in rhyolite. 1705 crosscut advanced 21 feet in west end rhyolite.

Shoring is in progress on Morgeson vein and Jerome vein.

1700 Level—1704 crosscut advanced 26 feet in rhyolite. 1705 crosscut advanced 21 feet in west end rhyolite.

Shoring is in progress on Morgeson vein and Jerome vein.

1700 Level—1704 crosscut advanced 26 feet in rhyolite. 1705 crosscut advanced 21 feet in west end rhyolite.

Shoring is in progress on Morgeson vein and Jerome vein.

1700 Level—1704 crosscut advanced 26 feet in rhyolite. 1705 crosscut advanced 21 feet in west end rhyolite.

Shoring is in progress on Morgeson vein and Jerome vein.

1700 Level—1704 crosscut advanced 26 feet in rhyolite. 1705 crosscut advanced 21 feet in west end rhyolite.

Shoring is in progress on Morgeson vein and Jerome vein.

1700 Level—1704 crosscut advanced 26 feet in rhyolite. 1705 crosscut advanced 21 feet in west end rhyolite.

Shoring is in progress on Morgeson vein and Jerome vein.

1700 Level—1704 crosscut advanced 26 feet in rhyolite. 1705 crosscut advanced 21 feet in west end rhyolite.

Shoring is in progress on Morgeson vein and Jerome vein.

NO DECISION ON TREATY FOR MANY DAYS

(By Associated Press)
LONDON, Dec. 17.—The final decision on the final treaty by the British government on the question of the 1919-20 treaty will not be made for many days, according to a statement from the British government today.

The detailed official report of the committee for the treaty is being prepared and will be ready in a few days.

Silver Top Shaft
Drift 125 East and 125 West—Drifting on strike of high grade ore.

Drift 250—Drifting on strike of high grade ore.

Drift 454—Usual progress with no change.

Drift 5026—Intersecting? Working on one foot low grade quartz.

Drift 621—Usual progress with no change.

Mizpah Shaft
Crosscut 255—Discontinued.

Drift 315—Usual progress with no change.

Raise 371—No change to report.

579 Intermediate Crosscut—Has broken into old stage on Mizpah vein.

Drift 567—East Intermediate—Drifting on one foot mill ore.

Drift 613—No change to report.

Sand Grass Shaft
Raise 1021—No change to report.

Raise 1024—Has cut about two feet of mill ore on Morgeson vein.

Raise 1161—Raising in Morgeson vein on low grade ore.
